

# Allegro

## / Getting started

Allegro is the biggest Polish e-commerce platform with over 11 million users. This integration allows the Yves Rocher e-commerce platform to receive orders made on an Allegro platform and process them like an order made on the website.

### Remember

Romanian Yves Rocher website is also using a Baselinker integration in a more expanded version, which works as a bridge between Emag.ro and Yves-rocher.ro websites. More about Baselinker can be found in the [Baselinker](#) article.

Visualization of the Allegro orders tab

In this tab we can see basic information like:

- **First and last name of the customer**
- **Customer's city**
- **Customer's Street**
- **Customer's Postal code**
- **Customer's Mobile number**
- **Order creation time**
- **Yves Rocher order ID**

We can see more details regarding the selected order by selecting **Show more** button (1).

Order	
Id	2117
Allegro Order Id	8c568ed1-7f56-11eb-b458-e1283219ff0c
Order ID	19868631 <a href="#">See</a> 2
Creation time	2021-03-08 12:35:03
Update time	
Message	

*Visualization of the order tab in the order details*

In **Order** tab, we can check order

- **ID** - Allegro module specific ID of the order
- **Allegro order ID** - Allegro platform order ID
- **Order ID** - Yves Rocher Order ID. By clicking “**See**” button (2) we can check it in the **Orders > Orders / list** section like rest of the e-commerce orders.
- **Creation time** - Creation time of the order
- **Update time** - Update time of the order (if updated)
- **Message** - Customer message to the seller

The next tabs are **Customer Data** and **Delivery Address**

Customer data	
First name	<input type="text"/>
Last name	<input type="text"/>
E-mail:	<input type="text"/>
Mobile	<input type="text"/>
Street	<input type="text"/>
Postal code	<input type="text"/>
City	<input type="text"/>

Delivery Address	
First name	<input type="text"/>
Last name	<input type="text"/>
Mobile	<input type="text"/>
Street	<input type="text"/>
Postal code	<input type="text"/>
City	<input type="text"/>

*Visualization of the Customer data and Delivery address tabs in the order details*

These tabs display detailed customer data and delivery address data. They will have different data only when delivery address data is different from customer invoice data on the Allegro platform.

In the last tab we can see is **Order data** tab.

Order data	
Status	READY_FOR_PROCESSING
Delivery	Allegro Paczkomaty InPost
Payment	PAYU
Price	48.79 PLN

*Visualization of the Order data tab in the order details*

This tab displays order information like:

- **Status** – Order status. It should be set to “**READY\_FOR\_PROCESSING**” if imported correctly to the Yves Rocher e-commerce platform.
- **Delivery method** – Selected delivery method by customer
- **Payment method** – Selected payment method by customer. If delivery method is with COD, it'll be empty
- **Price** – Price, that customer paid. If the delivery method is COD, it'll be empty.

## / Allegro delivery methods

In order to map allegro's delivery method on Yves-Rocher website, we need to navigate to **Orders > Allegro delivery method**.

Orders / Allegro delivery methods				+ Add Allegro delivery method
Show 10 entries		Search:		
ID	Allegro ID	Public name	Public description	Actions
1		Allegro DPD	Allegro DPD delivery method	<a href="#">Edit</a> <a href="#">Delete</a>
2		Allegro DPD COD	Allegro DPD COD delivery method	<a href="#">Edit</a> <a href="#">Delete</a>
3		Allegro Post Point	Allegro Post Point delivery method	<a href="#">Edit</a> <a href="#">Delete</a>
4		Allegro Post	Allegro Post delivery method	<a href="#">Edit</a> <a href="#">Delete</a>
5		Allegro Inpost	Allegro Inpost delivery method	<a href="#">Edit</a> <a href="#">Delete</a>
Showing 1 to 5 of 5 entries				<a href="#">← Previous</a> <a href="#">1</a> <a href="#">Next →</a>

Showing 1 to 6 of 6 entries					<div> <div>← Previous</div> <div>1</div> <div>Next →</div> </div>	

Visualization of the added Inpost24 delivery method

With the newly added Allegro delivery method, we can proceed to map it.

# Mapping Allegro delivery method

In order to map delivery methods, we need to press the "**Add delivery method mapping**" button.

**Allegro delivery method mapping**

**Mapping**

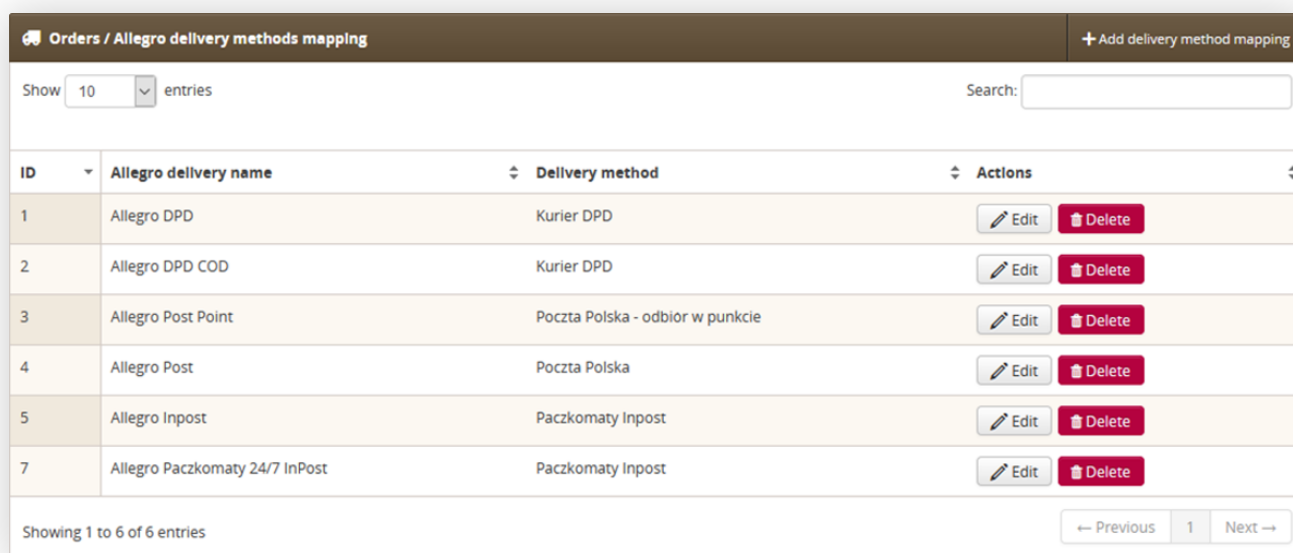

Allegro delivery name \*

Delivery method \*

*Visualization of the mapping delivery method*

We need to select from the list our desired Allegro delivery method created earlier and Yves Rocher delivery method defined from **System > Delivery types / list**.

After selecting desired delivery methods, we need to press **Save** button to map them.

ID	Allegro delivery name	Delivery method	Actions
1	Allegro DPD	Kurier DPD	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
2	Allegro DPD COD	Kurier DPD	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
3	Allegro Post Point	Poczta Polska - odbior w punkcie	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
4	Allegro Post	Poczta Polska	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
5	Allegro Inpost	Paczkomaty Inpost	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
7	Allegro Paczkomaty 24/7 InPost	Paczkomaty Inpost	<input type="button" value="Edit"/> <input type="button" value="Delete"/>

Showing 1 to 6 of 6 entries

*Visualization of the mapped delivery method*

With configured mapping, we can see which allegro delivery methods corresponds with already existing methods for e-store.

## / Allegro errors

Allegro errors is the tab that displays all errors of the imported orders made on Allegro platform. This tab can be found in the **Orders > Allegro errors**.

Fall Import list		
Allegro order ID	Error details	Last changed
9f9bd4f2-07bf-11eb-9f72-01d2d14a21e7 <a href="#">Force re-check</a> <b>1</b> <a href="#">Set as processed</a>	Allegro product from order not found <a href="#">Order details</a>	2020-10-06 12:53:26
84bd47f0-07be-11eb-9f72-01d2d14a21e7 <a href="#">Force re-check</a> <a href="#">Set as processed</a>	Order rejected: Address (delivery) does not match requirements (details: {"errors":{"postal_code":{"unknownPostcode":"Podany kod pocztowy jest nieprawid\u0142owy. Obs\u0142ugujemy jedynie klient\u00f3w z Polski."}}}) <a href="#">Order details</a>	2020-10-06 12:30:04
29750ec2-fd80-11ea-9cb6-d3a01be37ee6 <a href="#">Force re-check</a> <a href="#">Set as processed</a>	Order rejected: Order data does not match schema, Number expected, null received at #->properties:payment->\$ref[#/definitions/payment]->properties:cost <a href="#">Order details</a>	2020-10-05 13:19:31

Visualization of the Allegro errors tab

Two most basic import errors we can find here are:

- **Allegro product from order not found** – this import error appears, when someone buys a product with certain SKU on allegro, that doesn't exist on Yves Rocher e-commerce platform product catalog.
- **Order Rejected: Address (delivery) does not match requirements** – This error appears when customer buys products on allegro and types (in this case) a postal code that isn't in the postal code dictionary on e-commerce platform. Works only when postal code dictionary is activated in the admin panel.

When the error has been fixed on the Allegro side, we can try to re-import the order by clicking the **Force re-check** button **(1)**.

Revision #2
